ARMSTRONG CEILINGS LAUNCHES INTERACTIVE GALLERY

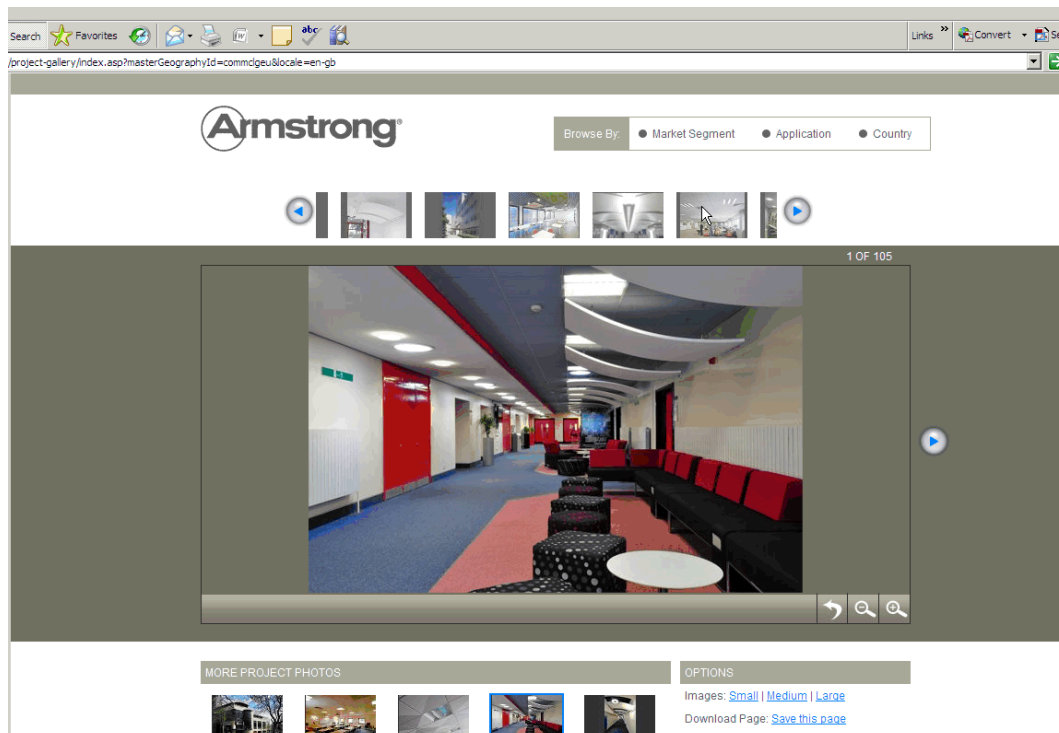

What must be one of the most comprehensive, if not also eye-catching website project galleries of its kind has been launched by leading interior solutions provider Armstrong Ceilings.

The interactive gallery under Armstrong's *Inspiration and knowledge* section, http://www.armstrong-ceilings.co.uk/commclgeu/eu1/uk/gb/photo_gallery.html, showcases more than 100 of the company's latest projects in the UK and 12 other European countries.

Easily browsable by market segment, application and country, the gallery features inspirational images of projects in education, healthcare, offices, industry, retail and leisure, and transport.

With options to download small, medium or large images, or pages in general, the gallery includes applications as diverse as a church, swimming pool, retirement complex, airport, police station and bakery, even a couple of architects' own offices – the ultimate accolade.

Armstrong lets the images speak for themselves, with project details limited to the project's location, architect, contractor, sector, products used and where, size of project in terms of area covered, and year.
